Andy Kockler  
Metalife Industries  
PO Box 53  
Reno, PA 16343

Dear Andy,

We examined the sample specimen for John Deere [ATS Lab ID 87851] in accordance with procedure AMS2438D section 3.4.5(b).

The specimen submitted showed no visible indications (turning blue) of any cracking or pitting when subjected to the specified potassium ferricyanide/sodium chloride solution for 10 minutes.

Therefore the sample submitted passed the requirement listed.

Thank you for your business, and we look forward to working with you in the future.

Very truly yours,

Richard M. Eakin,  
President
